Work Experience

Zentreelabs Pvt Ltd (April 2023 to Present)

Project: EDBot Application

Description: This project aims to build an application showing a user conversation on electronic devices which gives answers to the user. This application consists of a UI part to take user details stored in MongoDB then navigates to the user conversation page where the user-entered question is sent to the model and the equivalent answer is displayed on the page.

Responsibilities:

- Implementing application frontend in Reactjs.
- Implementing application backend in Nodejs.
- Integrating the question-and-answer model into the application.

Project: Resourcing Bot Application

Description: The Resourcing Bot is a solution designed to automate various tasks for recruiters, including profile search, interview scheduling, and the screening process. It will help in reducing the manual effort and streamlining the recruitment process.

Responsibilities:

- Implementing LLM model to retrieve relevant resume for given job description.

- Implementing application backend in Nodejs and flask.
- Implementing Auto-screening engine with predefined questions.
- Implementing scheduling engine to scheduling interviews with qualified candidates.

Declaration:

I hereby declare that all the information stated above is true to the best of my belief.
